

ULTRA LENS

A proprietary lens developed independently by Yamamoto Kogaku to enhance contrast. Designed to make objects stand out, it improves visual performance for workers. Ideal for visual inspections of foreign object, scratches, cracks, dents, distortions, and irregularities on product surfaces.

Image of ULTRA LENS

[Image of naked eye vision]

[Image of the vision through ULTRA Lens inspection]

- Good for visual inspection and particle inspection because of sharply defined and clear vision.
- Good for inspection of unevenness of painting and detecting a foreign objects.
